

POLYSCAPES DECORATIVE FLOOR SYSTEM

LPC Polyscapes Flooring System

A polyaspartic-topped scape aggregate flooring system delivering the look of stone, terrazzo and marble — engineered for superior UV resistance and color retention in high-light environments.

// SYSTEM PROFILE

Category	Poly-Guard
Topcoat	Polyaspartic
Aggregate	1440 Scares
Antimicrobial	Available
Textures	A • B • C

// COMMON APPLICATIONS

- Schools & education
- Hospitals & healthcare
- Retail & lobbies
- Research labs

**POLY-GUARD****LPC Polyscapes Flooring System**

02 / 04

A polyaspartic-topped scape aggregate flooring system that provides designers with endless floor finish creations. Delivers the look of stone, terrazzo and marble while offering superior UV resistance and color retention — well suited to areas exposed to natural light. Available with our **LPC Micro-Guard** antimicrobial.

Common Applications

Typically installed over clean prepared concrete where a sophisticated, light-stable floor finish is desired. Specific applications include, but are not limited to: schools, hospitals, research laboratories, retail spaces, lobbies, and corridors with significant daylight exposure.

Physical Properties

DESCRIPTION	STANDARD	RESULT
Tensile Strength	ASTM C307	3,270 p.s.i.
Compressive Strength	ASTM C579	12,500 p.s.i.
Modulus of Elasticity	ASTM C580	N/A
Flexural Strength	ASTM C580	5,150 p.s.i.
Impact Resistance	ASTM D2794	>160 in. lbs.
Abrasion (CS17 1000g) *	ASTM D4060	0.014g
Flammability (adhered)	ASTM D635	Self-Ext.
Adhesion to Concrete	ASTM D7234	>450 SF
Wet SCOF	ASTM E303	0.7
Accelerated Weathering	ASTM G154	Slit. yellow

Physical properties can be improved by selecting different components. Should you require higher performance than our base system components, please speak to a Liberty Pro Coatings Engineer. * When higher abrasion resistance is required, the addition of LPC 1336 to the coating should be included.

System Cross-Section

Options

Cove Bases **Available**

Antimicrobial **Available**

Waterproofing Membrane *Not Available*

Colors *See back panel*

Texture A — light broadcast, smooth-roller finish. Texture B — medium broadcast, light slip-resistance. Texture C — heavy broadcast with non-skid additive for wet environments.

// OPTIONAL FINISH COATS

UG-51

Non-Skid — see **UG-51** TDS for non-skid information and substrate preparation requirements.

LPC 1498

Micro-Guard

Proprietary Anti-Microbial Pathogen Additive

// WHAT IT IS

- A proprietary additive blended into the LPC topcoat at the point of installation.
- Continuously suppresses microbial growth on the finished floor surface.

// ADVANTAGES

- Effective against bacteria, mold & mildew
- Does not leach or wash off
- No VOCs added to topcoat system
- Suppresses MRSA, E. coli, Salmonella
- Maintains color & gloss retention
- Compatible with all LPC topcoats

Scape Colors

Standard color blends available in this system.

Custom colors available on request.

Color reproduction is approximate and may vary based on print conditions, lighting, substrate texture, and topcoat selection. Please contact LPC for physical samples before final specification.

In the unlikely event of a problem with any LPC system, our team responds quickly and stands behind every installation. From specification to final walk-through, our promise is straightforward.

We pledge to do whatever we can to make every Liberty Pro Coatings floor a success.
